

We are now entering an exciting, unprecedented time in technology – with the pace of change and innovation continuing to accelerate. Technology will continue to transform the way we work and live, raising many questions about both opportunities and challenges at all team levels of the enterprise from strategy through operations.

Teamwork is one of the most important aspects of the modern workplace. However, widespread Internet availability means that members of the team could be just about anywhere in the world. So, for teamwork to be effective, it's important for companies to adopt modern work practices and technologies that help co-workers, wherever they are, share their work in a simple and efficient way.

**CollStack, in modern workplace**  
It doesn't only provide video calls but offer team to communicate and collaborate during, and after the meetings and stay effective using a private virtual space exclusively created for your company and accessible to your teams only. It is a Software as a Services (SaaS) based model.

**CollStack is a game changer**  
Collstack can be used as a plain conferencing solution, its ultimate value comes into play when it is made part of your business by providing specialized services to your customers such as:

### Conferencing

Increase productivity and efficiency by reducing unproductive travel time, preventing meeting delays, creating shorter and more structured meetings

### Workforce Management

Adding video terminals in the stores to provide access to a pool of remote experts who can remotely assist clients.

### Education

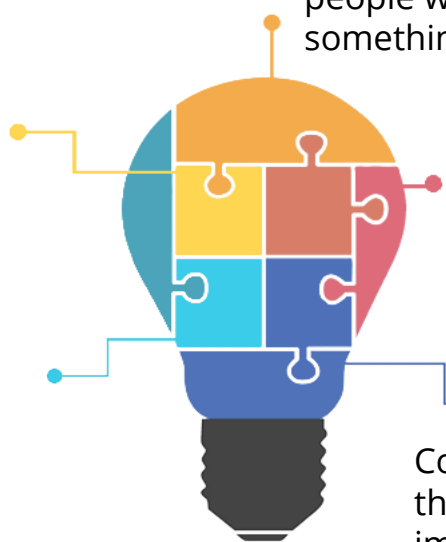

There are thousands, if not millions, of people who undoubtedly have something to offer the world.

### Health

Enables patients and physicians to meet for consultations from wherever they may be without the need for travel.

### Call Center

Companies who are embracing the omnichannel concept can improve the customer experience around their service offerings.

Collstack is highly customizable with technology for people approach and offers below salient features
